Data Analyst | Power BI | SQL

Professional Summary

Data Analytics enthusiast with strong skills in Python, SQL, and Power BI. Experienced in data cleaning, pre-processing, and building interactive dashboards for data visualization. Proficient in analyzing datasets to identify trends and generate actionable insights. Skilled in transforming raw data into meaningful reports to support decision-making. Seeking to contribute to data-driven and Business Intelligence projects.

Technical Skills

- **Data Analysis:** Data Cleaning, Data Visualization
- **Tools:** Power BI, MySQL Workbench
- **Programming:** Python (Pandas, Matplotlib), SQL
- **Database:** MySQL

Experience

Data Analyst Trainee

Dec 2023 – Jan 2024

TechRitzy Pvt. Ltd.

- Cleaned and preprocessed raw data to ensure accuracy and consistency
- Developed interactive dashboards in **Power BI** for performance tracking
- Automated reporting tasks to improve efficiency and reduce manual effort
- Generated data-driven insights to support decision-making

Projects

Logistics Data Analysis Dashboard

- Collected and cleaned logistics data
- Analyzed data using SQL queries
- Built **Power BI dashboard** to track delivery efficiency and resource usage
- Created visual reports to monitor logistics performance and support operational decision-making

Sales Data Analysis & Visualization

- Cleaned and preprocessed data using **Python (Pandas)**
- Performed data analysis to identify important sales trends
- Developed interactive dashboards in **Power BI**
- Identified sales trends and automated reporting processes
- Generated actionable insights from sales data to improve business performance tracking

IT Service Operations & Performance Analytics Dashboard

- Cleaned and transformed IT service and support data using **Power Query**
- Analyzed ticket volume, resolution time, SLA compliance, and support team performance
- Built an interactive **Power BI dashboard** to monitor operational KPIs
- Created visualizations to analyze ticket trends, issue categories, priorities, and resolution performance
- Used slicers and filters for interactive analysis across teams, issue types, and time periods
- Generated actionable insights to identify operational bottlenecks and improve service efficiency

Education

Master of Computer Applications

Acropolis Institute of Technology and Research

2025 – Present

Percentage: 78.0%

Bachelor of Computer Applications

Maharaja Ranjit Singh College

2022 – 2025

Percentage: 75.7%

Certification

NPTEL – The Joy of Computing Using Python
